EDUCATION

New York University

New York, NY

Bachelor of Arts in Computer Science and Data Science, GPA: 3.65

Expected May 2026

Relevant Coursework: Data Structures, Algorithms, Computational Linear Algebra (Graduate), Machine Learning

WORK EXPERIENCE

City Tech College

New York, NY

Teaching Assistant

Jul 2025 - Aug 2025

- Instructed 50+ students on AI/ML fundamentals funded by the Tsai Social Justice Fund
- Facilitated coding labs across 10 intensive sessions, maintaining consistent participation and positive evaluations
- Presented student projects (i.e. natural language processing, computer vision) for nonprofit leaders

Lexor Strategies

New York, NY

Software Engineering Intern

May 2025 - Aug 2025

- Built full-stack web applications to optimize client workflows using React, Tailwind CSS, and Supabase
- Spearheaded real-estate and marketing client consultations, scoping system architectures and deploying automation pipelines that accelerated reporting turnaround by 100%
- Designed internal tools and automation workflows, saving over 20 hours of team effort each week using custom LLM integrations, saving significant engineering hire costs

Simply Friendly, Inc.

New York, NY

Fullstack Developer

Jan 2025 - Apr 2025

- Developed an AI-driven matchmaking platform on AWS Amplify in Next.js and React Native that analyzed 5,000+ interaction records to provide more relevant club recommendations for students
- Implemented WebSocket-based chat for over 100 beta users, enabling real-time messaging for 30 concurrent testers and improving engagement in student organizations

PROJECTS

Realtime AI Debate Platform (Winner @ Brown University Hackathon 2025)

- Leveraged Vite to rapidly develop a web app facilitating student debates, integrating OpenAI's GPT API to analyze talking points, determine winners, and provide real-time feedback while streaming data via MongoDB
- Orchestrated backend data handling by creating custom Express.js routes for live streams, ensuring seamless server-client communication, and driving effective team collaboration

Story Generation Web App (Top 5 @ NVIDIA x Vercel Hackathon 2025)

- Architected a Next.js 15 full-stack app using React 19 and Tailwind/Radix UI to generate personalized children's comics, integrating NVIDIA NIM vision-language models for image analysis and story generation
- Built TypeScript API routes with custom image-validation middleware and orchestrated multi-step AI pipelines using NVIDIA Llama 3.3 and Consistency NIM models with robust error handling

LEADERSHIP

Google Developer Group - Head Developer

Sep 2025 - Present

- Leading a team of 5 to build a React web application integrating custom ML pipelines to predict NFL outcomes
- Selected among thousands of applicants to participate in this program focused on professional/leadership development in NYU

Tech @ NYU - Mentor

Sep 2024 - May 2025

- Held office hours and assisted over 30 students on SWE fundamentals and version control during the week, and led networking workshops that boosted club engagement by 50%

TECHNICAL SKILLS

Programming Languages: Java, JavaScript (React, Node, Express), Python, React, Tailwind, Expo, Prisma, PostgreSQL, AWS Amplify, MongoDB, Pandas, Figma
